Acceptance for Electronic Distribution of Safety Data Sheets

As specified by the Global Harmonization Standard (GHS), we are updating our Material Safety Data Sheets (MSDS) to Safety Data Sheets (SDS) format. Please choose from the following two options to obtain SDS information for the products you purchase:

- ☐ I agree that it is acceptable for our company to access and obtain Safety Data Sheets electronically via the Crest Industries, Inc. website, www.crestauto.com, or www.cresteastcoast.com
- ☐ I cannot access Safety Data Sheets electronically and require a hard copy.

3 QUART COMBO

THE ONE

The 1 is the only product you need to stock! The 1 is formulated with "van-cut micro media" that breaks down during the buffing process. The 1 transforms from an aggressive Compound (capable of restoring gloss to finishes sanded with up to 1200 grit) to an ultra-fine polishing glaze.

3 QUART COMBO
ZZ-12 \$49.00

FOTO FINISH

EZ On / EZ Off
Leaves no residue.
Remove by hand or with our Black Foam Polishing Pad.
A perfect companion product to "The One" polishing compound. Provides a fast and easy "show car" finish that doesn't wash off like other brands.
Won't streak or smear.
Polymer cross linked technology.

SLIXTER

Looking for speed?
With Slaxter, you can achieve a brilliant shine in no time!
Apply by hand or spray it on with a trigger sprayer.
Wipe it off with a Micro fiber Cloth and you are done.

METAL GRAY IN STOCK!

With our Friday delivery from Crest, our long awaited shipment of the NEW "Direct to Bare Metal" Gray seam sealer has arrived! Metal Gray, as those of you who attended our July warehouse workshop will remember, was introduced by Mike Schlaff at that time. "Metal Gray" is a direct to bare metal adhesive/seam sealer that has been specially formulated to "mimic" the color of most metals and aluminum. Hence its name!

Its light gray color will blend in with bare metal and aluminum. The advantage of such a formulation is that less primer and basecoat are required to "hide" the color of the sealer, hence, saving our customer time and money! Metal Gray increases the speed of the repair, while economizing materials.

Metal Gray will compete favorably with SEM's darker "waffen gray" colored seam sealer, \$39377.

The SEM product sells for a whopping \$37-\$43 per cartridge! This is considerably more than what our Crest seam sealers sell for! The popularity of the "gray" color has enabled SEM to corner the market, as they were the only "major" seam sealer source with this color. But, the SEM's product color is much darker than bare metal and therefore more primer is necessary to "hide" the sealer. Now with the introduction of the new Metal Gray, Crest enters the "Gray Market"!

As many of you may know, the 3M Company also has twin cartridge seam sealers. 3M's offerings however, are only offered in black! Most of them are NOT direct to bare metal! 3M recommends their sealers be applied to primed or coated surfaces! On the other hand, all Crest's seam sealers, are "Direct to Bare Metal"! Furthermore, 3M DOES NOT offer a lifetime warranty on their seam sealer products. In addition, 3M cartridges are a lesser fill at 6.75 oz. And SEM's is only 7.0 oz. Crest beats them both with a full 7.3 oz.! Additionally, Crest has also reintroduced the 10.0 oz. size cartridge to compete with the likes of IES, Kent, and Lord.

When it comes to adhesive strength, Metal Gray has been tested for lap shear and has been found to have a strength of 2150 pounds per square inch! GM recommends, door skin and panel bonding adhesives have a lap shear strength of 1500 p.s.i. or greater!

Metal Gray's 2150 p.s.i. lap shear, exceeds GM's requirements, but with its 10 minute working time it's not suitable for this use. However, its strength compares favorably with other Crest epoxy adhesives like, Jet Black and Big Qwixter! And again each cartridge of Metal Gray offers the customer a "Lifetime Warranty", just by completing and returning the warranty sheet!

In conclusion, Crests new Metal Gray seam sealer is direct to bare metal! Can be applied to primed or coated metal, aluminum and plastics. It is a high strength adhesive, making it suitable as a general purpose epoxy to repair plastics and bond and seal a variety other materials. Significant effort has gone into the formulation of its color so that it blends in with the color of most metals and aluminum.

The product has been extensively tested for its corrosion fighting qualities. As a result, Crest issues a written lifetime warranty with each cartridge sold!

Metal Gray a heavy bodied epoxy product and in side-by-side comparisons appears superior to the SEM offering of the same color! With its price advantage from \$5-\$10 per cartridge, it is the smart choice as well!

We expect Crest Metal Gray to equal, over time, the sales of our other great Crest seam sealers like, Black Majik, Thick n' Tan and Black Jack!

BUY 1 GET 1 FREE!

So, how do we market Metal Gray? Enclosed, please find 2 promos! ZZ-15 offers 2 cartridges of 7.3 oz. Metal Gray for \$38.00. ZZ-16 is 2 cartridges of the 10.0 oz. Metal Gray for \$49.00. Both, "Code 7" commission! This is a limited time offer! Customers may only purchase one promo of either ZZ-15 or ZZ-16! Not one of each!!! If a customer wants more material than the promo's quantities, they are to be sold at standard pricing! Enclosed you will find one cartridge of #CMG7, the 7.3 ounce Metal Gray as well as a widget with Metal Gray on ground aluminum.

#CMG7 is priced the same as CBM1, CBJ2 AND CTNT.
#CMG10- Priced as follows:
Code 1/ \$57.75
Code 2/ \$51.98
Code 3/ \$46.97

GENERAL INSTRUCTIONS

Stock No. CB-M1, Black Majik

Rev. 3-20-15

Work Time: 10 Minutes

Sand/Paint Time: 30 Minutes

HEAVY BODIED, FLEXIBLE, TWO-PART EPOXY SEAM SEALER WITH HIGH STRENGTH AND
OUTSTANDING ADHESION FOR APPLICATIONS WHERE A NON-FLOWING PRODUCT IS DESIRED

Preparation of GT-SU Applicator Gun and Cartridge

1. GT-SU plunger rods should be fully retracted. To release rods, hold gun by back handle, press thumb lever and pull back on knob.
2. Prepare cartridge for loading by removing cover from nozzle end of cartridge and snapping off end cap.
3. Load cartridge into gun. Make sure tab at front of cartridge is properly inserted in slot at front of gun. Prior to attaching static mixer nozzle, dispense a small amount of product to be sure both sides flow evenly. To stop dispensing, release pressure by pressing thumb lever.
4. Install static mixer. Dispense a short bead of material until color is uniform. Dispose of this bead. Product is now ready for application.
5. When application is complete, leave mixer nozzle installed on cartridge.
6. When preparing a used cartridge, remove old nozzle and re-balance cartridge as described in step 3 above. Make sure openings are free of obstructions before installing new mixer nozzle. Never attempt to force material through a blocked cartridge opening or used nozzle.

CB-M1 Black Majik Application Directions

1. Black Majik may be applied to bare metal, factory E Coat or metal surfaces primed with 2K Epoxy Primer. Aerosols and 2K Acid Etch Primers are not recommended.
2. Make sure area to be sealed is clean and dry. Clean with Crest Stock No. AAS or BSA-Acry Solv prior to sanding.
3. Sand bare metal surfaces with 80 grit sandpaper. Sand factory E Coat or fully cured 2K Epoxy Primer with 320 grit or scuff to remove gloss.
4. Remove sanding residue with clean, compressed air and re-clean with Acry Solv.
5. Apply Black Majik in a continuous, even bead. Sealer may be easily tooled if desired.

DO NOT ADD SOLVENT WHEN TOOLING BLACK MAJIK.

6. Black Majik has a 10 minute working time and may be sanded and painted in 30 minutes.

CUT HERE

WARRANTY

Crest Industries, Inc. ("Crest") warrants to the original purchaser ("Purchaser") that its Black Majik, Stock No. CB-M1 ("Product"), will, when applied according to the Crest General Instructions above, provide a seal for the life of the vehicle while used exclusively by Purchaser's customer owning the vehicle at the time of repair. The foregoing is Crest's sole and exclusive warranty, and all other warranties, express or implied, including the implied warranties of merchantability and fitness for a particular purpose, are excluded and disclaimed by Crest.

If this warranty is breached and the other conditions set forth herein have been met, Crest shall, as its sole and exclusive liability and Purchaser's sole and exclusive remedy, reimburse or credit the account of Purchaser for the reasonable costs of repair or replacement of the sealed components of the vehicle, provide replacement Product to repair the job, and/or shall assist Purchaser to address the customer's complaints. Except as provided above, Crest shall not be liable under any circumstance for any loss, damage, or expense directly or indirectly arising from the application and use of Product, and Crest shall not be liable for consequential or incidental damages.

This warranty is valid only if claim has been filed within 20 days after the discovery of the purported breach and the warranty registration form set forth below has been filed with Crest prior to 60 days after application of the Product. Warranty registration forms should be sent to:

Crest Industries, Inc.
1337 King Road
Trenton, MI 48183
Attention: Warranty Claims Manager

NEWPORT DOWNS[®] 500

**SALES
CONTEST**

What does selling Metal Gray and a Horse Race have in common?

Answer: Both have a **PURSE!**

The two new ZZ Promo's offer our customers BIG BUX in savings on our awesome new seam sealer! Imagine cutting your material cost in HALF! Even if it's only for 2 cartridges! The savings equals to the sale price!!

But all this is comes at an expense, yours as well as ours. So why do we choose to do it? Because, we know, once they try Metal Gray, 85% (at least) of those who tried it will be "HOOKED" on the product! On their second order and for the rest of their life, you will be "BANGING" them at Street Prices!

It's a numbers game! The greater the number of customers that try Metal Gray the greater the number of reorders!

Jim and I want to motivate you "Sales Sharks" even more by sweetening YOUR deal! So we are introducing a "Progressive Purse Horse Race"!

When the sum of the sales of ZZ-15 and ZZ-16 collectively (the entire Sales Farce) equals 100, Jim, I will PAY OUT One Hundred dollars! And for each and every ZZ sale afterward, a dollar will be additionally added to the purse!!

The Purse will be PAID OUT at the Newport Year End Extravaganza on Saturday Night, December 5th!

Fifth place gets 5% of the total purse! Fourth gets 10%, Third 20%, Second 25% and First receives the rest! 40% ! Pretty GOOD! Right?

Well there is more! Collectively break 200 ZZ's and the purse doubles! Two bucks a ZZ! The purse goes to \$400.00

But the fun doesn't stop there! Break 300 and the purse goes to \$900.00. Three dollars per ZZ!

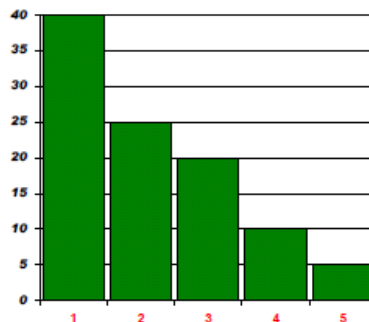

Mike Schlaff said, since this is his latest "PET PROJECT", he'd like to get in on THE FUN! So sell 400 and the purse goes to \$1600.00!

With that kind of enthusiasm we might as well GO FOR BROKE. 500 pays out \$2500.00!

Saddle up, Jockeys! The RACE starts NOW!!!

PRODUCT TROUBLE SHOOTING!

WHERE DO I START ???

Market research:

*"When it comes to troubleshooting performance issues, organizations spend **58%** of the available time identifying the root cause of an issue"*

REP CORNER

PRODUCT TROUBLE SHOOTING GUIDE

1. TAKE LOTS OF PICTURES

BE SURE TO CLEARLY PHOTOGRAPH:

- ☐ THE VEHICLE AND THE AREA IN QUESTION
- ☐ ALL THE PRODUCTS USED & THEIR BATCH CODES!
- ☐ THE TECHNICIANS WHO PERFORMED THE WORK!
- ☐ PICTURES CAN BE E-MAILED TO HELP SPEED THE TROUBLE SHOOTING!
- ☐ THE MORE PICTURES THE BETTER!

2. PHONE ALL SUPPLIERS INVOLVED.

- ☐ AWAIT INSTRUCTIONS!

3. SAVE ALL MATERIALS USED ON THE JOB FOR INSPECTION AND TESTING.

BSB TEMP. GREEN TIME HARDNER

You can't cook a
turkey on HIGH in
Half an hour and get
GOOD RESULTS!

TECHNICAL BULLETIN HARDENER RATIO GUIDELINES FOR POLYESTER BODY FILLERS AND POLYESTER FINISHING GLAZES

Body Fillers

THE CORRECT MIX RATIO FOR BODY FILLER IS 98% FILLER AND 2% HARDENER (50 PARTS FILLER TO 1 PART HARDENER). BODY FILLER DOES NOT LEVEL AND FLOW AS MUCH AS GLAZE WHEN IT IS DISPENSED ONTO A MIXING PALLET. TO ACHIEVE A 2% HARDENER RATIO, RUN A STRAIGHT, UNIFORM BEAD OF HARDENER ACROSS THE DIAMETER OF THE PORTION OF FILLER. REMEMBER TO THOROUGHLY KNEAD THE TUBE OF HARDENER BEFORE DISPENSING.

CORRECT HARDENER RATIO FOR BODY FILLER

Finishing Glazes

THE CORRECT MIX RATIO FOR FINISHING GLAZE IS 98% GLAZE AND 2% HARDENER (50 PARTS GLAZE TO 1 PART HARDENER). FINISHING GLAZE WILL LEVEL AND FLOW (SOME MORE THAN OTHERS) WHEN IT IS DISPENSED ONTO A MIXING PALLET. TO ACHIEVE A 2% HARDENER RATIO, RUN A STRAIGHT, UNIFORM BEAD OF HARDENER AT LEAST 1/2 BUT NOT MORE THAN 3/4 ACROSS THE DIAMETER OF THE PORTION OF GLAZE. REMEMBER TO THOROUGHLY KNEAD THE TUBE OF HARDENER BEFORE DISPENSING.

CORRECT HARDENER RATIO FOR GLAZE

TECH TIPS FOR POLYESTER FILLER AND GLAZE

1. Do not alter hardener ratio to compensate for temperature conditions. Under-hardening results in the filler or glaze never achieving the full physical properties. This results in poor adhesion, strength and durability. Over-hardening may result in residual hardener on the sanded surface, which could react with primers and top coats.
2. When mixing fillers or glaze, fold the hardener into the product with a plastic spreader (do not stir). Apply pressure with the spreader during mixing and application to minimize air entrapment.

Trusted Source for Tough Solutions

3M has been APPROVED as a source for Rivet-Bonding Adhesives

3M and Ford have had a working relationship for almost a century, especially in the collision repair industry. From abrasive discs and masking tapes, to structural adhesives and seam sealers, 3M products have been an integral part of keeping Ford Tough.

When the next generation Ford F150 hit the drawing boards, 3M was there to work with engineers at Ford's Paint and Body Technical Center to help make sure collision repairers would have the right mainstream tools and materials in place before the vehicle even launched.

3M™ Panel Bonding Adhesive is one of the products recommended to repair rivet-bonded joints.

Part No.	Description	Size
PN08115	3M™ Panel Bonding Adhesive	200 mL Cartridge
PN38315	3M™ Panel Bonding Adhesive	50 mL Cartridge
PN58115	3M™ Panel Bonding Adhesive	450 mL Cartridge
PN08274	3M™ SMC/FRP Repair Adhesive—90	400 mL Cartridge

Additionally, the 3M™ File Belt Sander was so useful during the development of Ford's Collision Repair Workshop Manual, that it has found a place in Ford's own Aluminum Use Hand Tool Kit, sold through Rotunda. Whether grinding out SPR's, removing seam sealer, or prepping a flange, the 3M™ File Belt Sander is a key part of rivet-bonded repairs.

Part No.	Description
PN28366	3M™ File Belt Sander
PN31804	3M™ Green Corps™ Abrasive File Belt, 1/2 inch x 18 inch, 80 grit
PN64475	Scotch-Brite™ Durable Flex Belt, 1/2 inch x 18 inch, Coarse
PN64458	Scotch-Brite™ Durable Flex Belt, 1/2 inch x 18 inch, Medium
PN64467	Scotch-Brite™ Durable Flex Belt, 1/2 inch x 18 inch, Fine

Standard Operating Procedures

To help support the successful launch of the 2015 Ford F150 into the mainstream collision industry, 3M will be introducing a new series of aluminum-specific standard operating procedures. Look for them later in 2014 to make sure that YOUR shop is ready to repair.

Technical Information

The technical information, recommendations and other statements contained in this document are based upon tests or experience that 3M believes are reliable, but the accuracy or completeness of such information is not guaranteed.

Product Use

Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. Given the variety of factors that can affect the use and performance of a 3M product, user is solely responsible for evaluating the 3M product and determining whether it is fit for a particular purpose and suitable for user's method of application.

Warranty, Limited Remedy, and Disclaimer

Unless an additional warranty is specifically stated on the applicable 3M product packaging or product literature, 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY IMPLIED WARRANTY OR CONDITION ARISING OUT OF A COURSE OF DEALING, CUSTOM OR USAGE OF TRADE. If the 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price.

Limitation of Liability

Except where prohibited by law, 3M will not be liable for any loss or damage arising from the 3M product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.

At participating distributors. For complete details, contact your 3M Distributor or 3M Sales Representative.

INTENDED USE:

3M™ Heavy-Bodied Seam Sealer is a two part epoxy formulated to seal sheet metal joints where a non-sag, quick curing sealer is desired.

FOR DETAILED INSTRUCTIONS ON SPECIFIC REPAIR PROCEDURES, REFER TO THE ADHESIVES, COATINGS, AND SEALERS APPLICATION GUIDE.

OTHER APPLICATIONS:

- Use with 3M™ OEM Sealer Appearance Kit, PN 08200 to extrude shaped beads of sealer.

The following times have been determined with ambient air temperature and substrate temperature @ 70°F and are considered typical values. (A good rule of thumb with two part products is that for every 20 degree drop in temperature the time will double, and for every 20 degree increase the time will be cut in half.)

ACCESSORIES:

Applicator guns PN 08571, 08117, 09930
3M™ Mixing Nozzle PN 08193, 08194
3M™ OEM Pins PN 08200, 08201-08205

SURFACE PREPARATION:

NOTE: Apply only to surfaces primed with a 2K urethane, 2K epoxy primer, or clean, sanded paint. Acid etch primers should never be in direct contact with seam sealer.
(PN 07448).

1. Scuff primed surface with a ScotchBrite® General Purpose Hand Pad (Ultrafine).

PRODUCT PREPARATION:

1. Insert cartridge into applicator gun.
2. Remove retaining collar and plug from end of cartridge. Discard plug, save retaining collar.
3. Extrude a small amount of product until both parts A and B dispense equally.
4. Attach 3M™ Mixing Nozzle (PN 08193, 08194) to cartridge and lock in place with retaining collar.
5. Dispense a small amount of material and discard.

PRECAUTIONARY INFORMATION:

Before using this product, please reference Product Label and/or Material Safety Data Sheet for Health and Safety information.

Heavy-Bodied Seam Sealer

For use in 200 mL Applicator Gun

Matériau d'étanchéité pour joints de carrosserie à texture épaisse

Destiné à être inséré dans le pistolet-apPLICATEUR pour cartouches de 200 mL.

Sellador de Uniones de Elevada Intensidad

Para uso con la Pistola Aplicadora de 200 ml

- 3M™ Automix™ Epoxy Technology
- Technologie époxy Automix™ de 3M™
- Tecnología Epoxi Automix™ de 3M™

- Non-Sagging, Non-Flowing
- No Shrinkage/Cracking
- Great for Use with 3M™ OEM Pins
- No s'affaisse pas et ne coule pas
- No rétrécit pas et ne craquelle pas
- Convient aux embouts des FEO 3M™
- No se Pándese, No se Corre
- No se Encoraje ni se Agrieta
- Excelente para Usar con los Consejos OEM de 3M™

GENERAL REPAIR PROCESS:

1. Extrude sealer onto surface. Allow to cure a minimum of 15 minutes before beginning the painting process.

NOTE: If sealer is used to cure more than 24 hours, scuff the sealer prior to any painting steps.

APPLICATION WARNINGS:

Not to be used in direct contact with acid etch primers.

CLEAN-UP:

Prior to curing, PN 08308 may be cleaned from most surfaces with an appropriate 3M VOC compliant product for removal of surface contaminants. Reference the 3M Automotive Aftermarket Catalog for a suitable VOC compliant product.

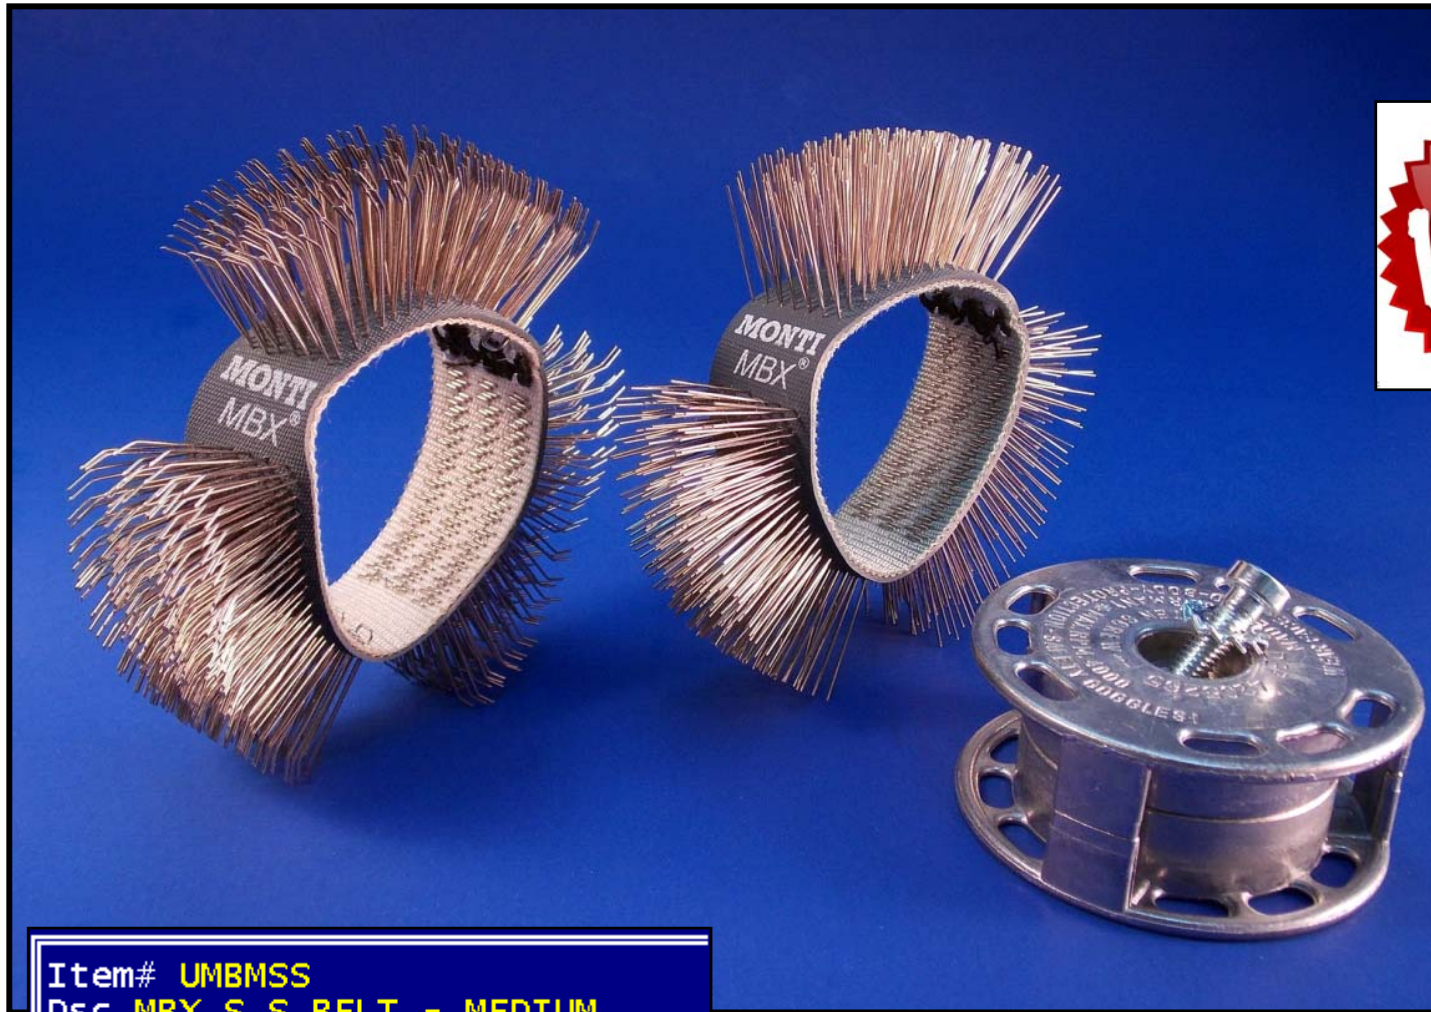

STORAGE:

After initial use, leave mix nozzle in place to seal the cartridge.

Product Use: Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. Given the variety of factors that can affect the use and performance of a 3M product, user is solely responsible for evaluating the 3M product and determining whether it is fit for a particular purpose and suitable for user's method of application.

Warranty, Limited Remedy, and Disclaimer: Unless an additional warranty is specifically stated on the applicable 3M product packaging or product literature, 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY IMPLIED WARRANTY OR CONDITION ARISING OUT OF A COURSE OF DEALING, CUSTOM OR USAGE OF TRADE. If the 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price.

Limitation of Liability: Except where prohibited by law, 3M will not be liable for any loss or damage arising from the 3M product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.

ALUMINUM / STAINLESS STEEL MEDIUM AND FINE

MBX METAL BLASTER

Excellent for removal of seam sealer, undercoating, stone guard and urethane. Can be used to remove rust and paint in sharp areas or to clean spot welds when installing a new panel. No heat creation or clogging. Coarse particles fall to the ground instead of lingering in the air. Re-sharpens in reverse motion.

The Rubber Eraser wheel is excellent for the removal of decals, pinstripes, and double sided molding tape. Air cushion by centrifugal force during rotation. No vibration, no jumping. Lower heat build up due to the paddle wheel design.
